PS40

Icemaker - Paddle System  
38kg production, 12kg storage

### General Information

The PS Series - specifically designed as a fully electromechanical ice maker which does not require a thermostat to operate.

The full ice making process is controlled by micro-switches which detect when the storage bin is full of ice to stop production.

This unique method allows the PS Series to be installed in ambient temperatures as low as +5°C making them ideal for installation in cellars and unheated rooms.

The Prodis PS40, benefits from a 38kg production per 24 hours and a 12kg storage bin.

### Key Features

### Construction

### Available Options

- Paddle system production
- Ideal for hard water areas
- Operates without thermostats
- Can be installed in ambient temperatures as low as 5°C or as high as 43°C.
- Space saving inward opening door
- Mains on off switch
- Tropicalised condensing unit

- AISI304 stainless steel construction

- Everpure 4H water filter

## Technical Data

Model	PS40
Production / 24 hours	38kg
Storage bin	12kg
Ice shape	Bullet
Defrost type	Hot gas
Condenser type	Air
Evaporator	Finger
External Dimensions	Width = 401 Depth = 506 Height = 698*
Interior Finish	Food safe plastic
Exterior Finish	AISI304 Stainless Steel
Power supply	230v 50hz
Power rating	421w
Refrigerant	R290

\*+15mm to 57mm adjustable feet
