PS75

Icemaker - Paddle System
75kg production, 37kg storage

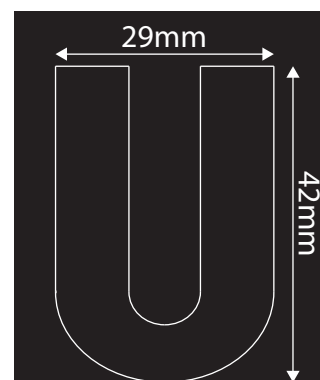

General Information

The PS Series - specifically designed as a fully electromechanical ice maker which does not require a thermostat to operate.

The full ice making process is controlled by micro-switches which detect when the storage bin is full of ice to stop production.

This unique method allows the PS Series to be installed in ambient temperatures as low as +5°C making them ideal for installation in cellars and unheated rooms.

The Prodis PS75, benefits from a 75kg production per 24 hours and a 37kg storage bin.

Key Features

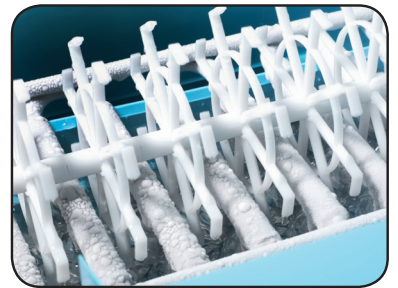

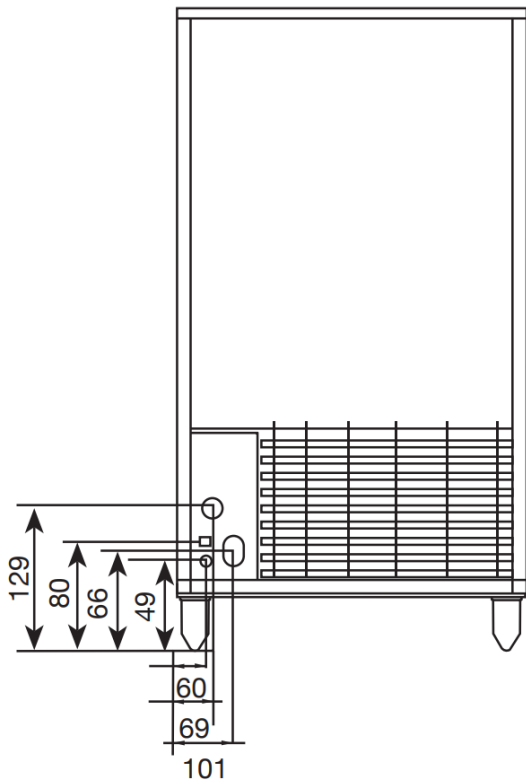

Construction

Available Options

- Paddle system production
- Ideal for hard water areas
- Operates without thermostats
- Can be installed in ambient temperatures as low as 5°C or as high as 43°C.
- Space saving inward opening door
- Mains on off switch
- Tropicalised condensing unit
- R290 refrigerant
- AISI304 stainless steel construction
- Everpure 4H water filter

Technical Data	
Model	PS75
Production / 24 hours	75kg
Storage bin	37kg
Ice shape	Bullet
Defrost type	Hot gas
Condenser type	Air
Evaporator	Finger
External Dimensions	Width = 673 Depth = 557 Height = 984*
Interior Finish	Food safe plastic
Exterior Finish	AISI304 Stainless Steel
Power supply	230v 50hz
Power rating	775w
Refrigerant	R290

*+95mm to 165mm adjustable feet
