PD20H SS

Wine shelves available as an optional extra – POA (PD10H - 5 bottles per shelf
PD20/30 models - 4 bottles per shelf
PD30 models to right & left hand door only)

Product Description

Pubs and restaurants rely on having quality back-bar coolers. The Interlevin PD-Stainless range is made with efficiency and reliability in mind. We fit high quality German made EBM fan motors as well as condensers that are less liable to blocking. This means extra efficiency and peace of mind for your drinks cooling. The exterior is finished in high grade 304 brushed stainless steel as are the door which have a “one piece” door frame with no joints at the corners, giving it a cleaner look which also makes for a stronger door. The interior is mirror finish stainless steel which makes it feel lighter and larger, displaying drinks to perfection. The units come with locks as standard and have digital controllers and temperature display for ease of operation. The controller is behind a sliding plastic panel to protect it from the rigours of a busy bar.

Features and Benefits

- Fully automatic
- Fan assisted cooling
- Lock
- Adjustable shelves
- Mirror finish stainless interior
- Adjustable feet
- Interior light with switch
- Digital controller and temperature display
- Self closing door
- High strength single piece stainless steel door frame (no joints at corners)
- High quality catering grade 304 stainless steel
