PSL50 Design & Function

For decades, innovation, quality and design have been the primary pursuit of every product we develop at Spengler.

Combining engineering and precision with a keen understanding of office coffee needs and the vending industry, we create products that guarantee excellent reliability and great flavour in every cup.

By focussing on the user first, we have created an intuitive touch screen interface that is backed up by our patented brewing technologies, so our products are as smart as they are easy to use. Plus, with the top-tier A++* energy-efficiency rating, our machines are designed to be very kind to the planet, something you can feel very good about!

All this performance combined with fast, easy cleaning and maintenance makes Spengler the preferred choice for automated coffee equipment.

* according to the EVA EMP standards set by the European Vending Association (EVA).

The Environment

The environment truly is our most precious possession – it is our home – and protecting and preserving it is everyone's responsibility.

Our customers appreciate that our ECO-friendly, intelligent power saving modes and energy-efficient software helps them to do their part in caring for our planet in their own office. Lower energy consumption also means a lower energy bill and lower overall operating costs, achieving an EVA EMP rating of A++.

However the pursuit of reduced overall consumption has not been at the cost of quality. Spengler machines are the result of continuing efforts to improve machine quality and total coffee throughput. So our office coffee solutions will last longer and cost less to operate without sacrificing output capacity.

Espresso Brewing Technology

Espresso is an art. But unlike a fine painting, it can't be a one-time masterpiece, it has to be perfect and it has to be repeatable.

Our patented espresso brewer takes the stress out of espresso by making the perfect single or double shot every time - automatically.

Because every bean and roasting process has its own unique story to tell, our espresso brewer is adjustable for strength, dose size*, extraction rate, and volume. So you can have your shot exactly the way you like it.

The perfect espresso must be bold, bright, and full-bodied with a rich crema carrying creamy notes of the beans' oil and earthiness. And since great espresso starts with good water, we always recommend using a high-quality water filtration system to ensure your espresso is never let down by off-tasting or poor quality water.

The Spengler espresso system utilises the same methodology as a traditional espresso machine, and combines it with proprietary technology to provide a barista quality espresso every time with just the push of a button.

* Up to 14 gram

7" Intuitive User Touch Screen

Spengler has a user interface that is simple and easy to use. On our 7" screen, users have the ability to customize their own drinks and choose from a variety of coffee favourites. For the true connoisseur, we offer the possibility to fine-tune their drinks.

You can easily manage and control the machine's hardware, stats, cleaning, maintenance, alerts and visual appearance. Customise the display user interface appearance to match your decor or graphic profile. We can help you to control the colour of the icons, wallpaper, screen saver, logo and image for brewing. All settings are designed to allow the machine to be adapted to the location and user.

On our machine, you get a high quality visual experience which can be varied over time. All to create a unique coffee experience.

PSL5012

- 1 grinder & 1 bean hopper
- 2 instant ingredient canisters
- Espresso brewing system
- A++ rating
- Base cabinet (optional)
- 7" touch screen
- Intuitive user experience
- Customisable menu settings,
- Branding and appearance
- 12 standard beverages (220 max)
- Intelligent energy save mode

PSL5013

- 1 grinder & 1 bean hopper
- 3 instant ingredient canisters
- Espresso brewing system
- A++ rating
- Separate hot water outlet
- Cup sensor
- Base cabinet (optional)
- 7" touch screen
- Intuitive user experience
- Customisable menu settings,
- Branding and appearance
- 15 standard beverages (220 max)
- Intelligent energy save mode

PSL5014

- 1 grinder & 1 bean hopper
- 4 instant ingredient canisters
- Espresso brewing system
- Fresh/Filter brewing system
- A++ rating
- Separate hot water outlet
- Cup sensor
- Base cabinet (optional)
- 7" touch screen
- Intuitive user experience
- Customizable menu settings,
- Branding and appearance
- 17 standard beverages (220 max)
- Intelligent energy save mode
