Designed for operators who know that ice is critical to their business, the Manitowoc M-Series Ice Machine provides reliable and consistent performance. Manitowoc ice machines are designed, developed and tested by Manitowoc engineers to provide great ice production, energy efficiency and reliable service at an affordable price.

Performance/Features/Benefits

- Produces up to 645 lbs (293 kgs) of ice per day (half dice evaporator at 21°C/10°C)
- Highly efficient electro-less nickel plated copper evaporators assembled in Manitowoc, Wisconsin USA
- Simple operation - only one control, three positions ON/OFF/CLEAN
- 304 Stainless Steel exterior
- Better for the environment by using R290 refrigerant which lowers global warming potential by 99% compared to R410A
- Backed by the industry's best Manitowoc distribution network and service agents
- Built for easy sanitation
- Easy access front facing evaporator
- Remedial cleaning requires minimal interaction; just add chemical and let the machine do the rest. No ice removal from bin needed. (Use Manitowoc De-scaler and Sanitizer only)
- For detail cleaning; all food zone components removable by hand (Fast and easy, no tools required)
- No exposed tubes or wires, smooth rounded corners for fast easy wipe downs
- The food zone is sealed from above and on the back of the door panel with commercial grade rubber gaskets
- AlphaSan® anti-microbial agent molded in selected components
- Available CleanAir™ pack helps to control the growth of bacteria and fungi that form slime and cause odors in the food zone

Sustainability & Value

- **R290 Natural Refrigerant** - Minimize global warming potential and still maintain a high performance with R290 propane refrigerant
- **Overall Lifetime Value** - Lower cost of ownership over the life of machine with decreased energy and water consumption as compared to legacy models
